EDUCATION

MBA (Business Analytics)

Manav Rachna University | 2025–27

SGPA: 9.17 / 10 (Semester II)

Bachelor of Commerce

University of Delhi | 2020–23

CGPA: 8.23 / 10

Senior Secondary (AISSCE)

St. Mary's Public School | 2020

92.4%

CORE SKILLS & TOOLS

Analytics

Python (Pandas, Scikit-learn, SciPy),
SQL / MySQL, SPSS

BI & Visualisation

Power BI, DAX, Power Query, Tableau,
Advanced Excel

Methods

Requirements gathering, data modelling
(star schema), ETL & data cleaning,
EDA, KPI reporting, primary research

- NISM Financial Literacy — Kotak (90%)

LANGUAGES

English (Fluent) · Hindi (Fluent) ·
Japanese (Beginner)

PROFESSIONAL SUMMARY

MBA (Business Analytics) candidate who builds analytics end to end — Power BI dashboards on star-schema models, predictive models in Python, and primary research at scale. Four projects published and documented on GitHub. Comfortable framing the business question first, then cleaning the data that actually exists to answer it.

WORK EXPERIENCE

Business Analytics & Strategy Intern | Kritavin Private Limited Jun 2026 – Jul 2026

- Analysed company operational data to surface actionable patterns, translating open-ended business questions into defined analyses.
- Delivered data-driven operational insights and strategy recommendations; commended by the Director for the practical value of the work.

Operations & Accounts Assistant | K.C. Dhyani Catering Service Jan 2024 – Dec 2024

- Introduced UPI and digital payment channels, opening the business to cashless customers and contributing to an approximate **15% increase in revenue**.
- Managed daily operations and inventory data in Excel; handled GST invoicing, expense tracking and GeM tender documentation.

KEY PROJECTS

Capital Structure & Performance Dashboard | Power BI · DAX · Power Query · Python

- Analysed leverage and profitability across **226 large-cap companies**; cleaned financials in Python and restructured a flat file into a star schema, with five DAX measures for leverage, margin and capital efficiency.

Sales & Inventory Analytics Dashboard | Power BI · MySQL · DAX

- Built a three-page report on a live MySQL database. Surfaced customer concentration risk (two clients ≈ 15% of payments across 122) and inventory misaligned with demand — 555K units in stock against 106K sold annually.

Predictive Lead Scoring Model | Python · Scikit-learn · Pandas

- Cleaned a **9,240-record** lead dataset and trained a logistic regression scoring model at **~91% accuracy, 0.97 ROC-AUC**; recommended a cutoff of 65, projecting ~80% conversion on contacted leads.

Inventory & Supplier Reliability Optimiser | Python · SciPy · Tableau

- Modelled safety stock across **12,000 order lines** using a dual-variability formula, isolating segments where buffer stock is driven by supplier unreliability rather than demand.

Socio-Cultural Assimilation Research | Student researcher · University of Delhi

- Surveyed 500+ students and interviewed 35 faculty on an IQAC-funded study. Found a stakeholder contradiction: faculty reported no curriculum problem while **78.9%** of students reported difficulty expressing themselves in English.

ACHIEVEMENTS

- Innovation Ambassador** (2025–26) — MoE's Innovation Cell & AICTE; 21 sessions of IA training.
- Team Leader**, Promulgare National Case Analysis Competition — Asian Business School, Noida (2026).
- Presented research paper, "Ethics of Creativity in the Age of Artificial Intelligence" — National Seminar, K.L. Mehta College (2026).
- Outstanding Volunteer** — ISACA New Delhi Chapter Annual Summit (2025).
- Student Organiser — 6th Management Development Program, Manav Rachna University (2025).
